HE NEW YORK AND CALIFORNIA MINT BILLS.
Mr. SEYMOUR. (dem.) of N. Y., enquired whether the committee have also had under consideration the question of a mint in New York and whether they were not ready, likewise, to report a bill favorable to that application; and if so, that he make the report at the same time that he does the California bill.

Mr. Housrow replied that the committee had also ordered the New York Mint bill to be reported. He was willing to vote for both of them; but the California bill should be noted upon first as it was intended immediately to reach the decase, and releve the distress of the gold diggers, these who do not traffic with their own treasure, and who have been large losers for the want of a mint. Gentlemen should not fasten the two together; let each stand on its own merits. He again asked permission to report the California bill.

Mr. Toomes, (whig) of Ga., objected.

Business of no particular importance having intervened.

Mr. Manshall, grain moved that the Committee of could not discover the colors of the flags of these versets. The event has been interpreted in different ways; the one which appears the most probable is the following. The pince where the first slup was seen, is the same taken by all fressels salling towards Cayenne. It is, then believed that these three vessels were transporting the French deported to Cayenne; that the first slip was in a very weak situation; that the transported revolted on beard, on spinosching the shores; that the captains of the other two vessels seeing, from a long dictance, that the first was hadly governed, suspected something wrong had occurred; they approached nearer, whom they saw what was passing; they ascertained it was a rebellion, and put an end to it.

Before disposing of the bill the morning hour expired.

LAND FOR A SEMINARY IN INDIANA.

The House passed a bill to make up to Indiana a deficiency of land for a seminary of learning in that State.

THE CALIFORNIA MIST BILL ONCE MORE.

Mr. Massall, again asked that the Committee of Ways and Means be permitted to report the California Mint bill. It could be passed without discussion.

Mr. Brook, (whig) of N. Y., said that while he was not opposed to the California bill, still he felt that he should be detelled to the duty he owed to his constituents, were he to permit the California bill to take precedence of the New York Mint bill. He suggested to Mr. Macalialt to include beth bills in this motion.

Mr. Peles (dem.) of Tend., made a similar motion, but several eartherne objected. they saw what was passing; they ascertained it was a rehelian and pet an end to it.

One Week Later from Mexico.

(From the N. O. Picayune, May 30.)

The brig John Williams, arrived here last evening, brings papers from the city of Mexico to the 13th, and from Vera Crus to the 15th of May.

The Niglo of the 3d inst has a long article upon the person appet of the Tehnantepec question. The editor may all parties in Mexico desire to see the great work of intercessive communication completed, but all fear that the nationality of Mexico would be jeopardized by the recognition of the daray grant. New propositions have been made, which appear to present a favorable solution of the difficulty. This evidently refers to the propositions of Cet Stow which as we amounced vesterday, have been accepted by the Chamber of Deputies.] The editor companies that much knowledge upon this important sudject is hid beneath the veil of diplomacy, and says that the rejection of the Tehnantepec treaty by the Chamber of Deputies, and recent publications, will doubtiess cause great irritation in the United States, and the American press will improve the opportunity to insuit Mexico and her government. Under these circumstances, and in view of the grave results that may be expected to arise to the nation from this question, the editor thinks for the right and the grave results that may be expected to arise to the nation from this question, the editor thinks for the publication of all the documents commetted with it, so that the people may know on whom to place the blame, if blame there be. After mentioning the formation of a treaty by Mr. Lotcher and Senor reduza, its modification by the United States government, and its final rejection by the Mexican Chamber of Deputies, its modifications with foreign powers must be previously revised by the legislative body. Only a complete reversal of the principles of international right could make the rejection of the treaty-causes bell. Such an absurdity does not need refutation. The editor regrets th clude both bills in this motion.

Mr. Pedra (dem.) of Tenn., made a similar motion, but several gentlemen objected.

So the oth of May, the government officials proceeded to saize, at Vera Cruz, the effects of several commercial houses—the English in preference, which had refused, in consequence of the continuance at Matamoras of Gen. Avales's low tariff, to sign bills for the payment of duties due under the old and high tariff. On the 7th inst, the government communicated to the marchants of Vera Cruz, the information, that the tariff had been raised to the old rates at Matamoras. This quieted the agitation at Vera Cruz in some degree; but further trouble was experienced, and the government seriously embarrassed as to what measures to adopt to relieve commerce there from its present perishing condition.

The Committee on Finance has reported to the Chamber of Beputies in favor of allowing the importation of foreign flour for three years, into Vera Cruz, in such quantity as the government may deem needed by the wants of the population—the duty being three dollars per barrel.

In answer to certain interrogations from the Chamber of Deputies, it appears that President Arista and three members of the cabinet are in favor of lowering the tariff on fereign importations, and abolishing those duties which amount to a prohibition of importation. One member of the cabinet is opposed to these measures.

The Chamber of Deputies has persisted, by a majority of forty-live votes, in recommending the lowering of the tariff by ten per cent., and the abolition of prohibitory duties. Several companies of riflemen had been raised on the American side for the protection of the frontier.
